Activity6

User interface

Imagine you are a designer. You are creating an app login screen. Which user interface components would you use? Answer the questions.

A button	A checkbox	A date/time picker	A list picker	A slider	An image	A switch	A text box	A label

	Question	
1	What would you use to type in the username?	
2	What would you use to type in the password?	
3	What would you use to tell the user information like what screen they were on?	
4	What would you use to let the user input their username and password to the app?	
5	What would you use to let the user change the screen brightness?	
6	What would you use to let the user select their country from a list of countries?	
7	What would you use to let the user select the date
