

Measuring weather elements

1. Match the measuring instruments to the weather elements.

<i>thermometer</i>	<i>hygrometer</i>	<i>anemometer</i>	<i>rain gauge</i>
<i>precipitation</i>	<i>wind</i>	<i>temperature</i>	<i>humidity</i>

2. Label the parts of the weather station.

3. Match

A thermometer	measures precipitation.
A hygrometer	measures temperature.
An anemometer	measures the speed of the wind.
A rain gauge	measures humidity.
