COMPUTERS

Preescolar y Primaria

Read the text then drag the correct answer to each question

These days people use computers everywhere: at work, at home, on the train or in the park. Many children also use computers at school.
People use computers for different reasons. For example, at work people use computers to send emails and to write reports. At home people use computers to play games, to listen to music, to look at their photos or to watch DVDs. People also use computers to connect to the internet and chat with their friends or shop online. At school children use computers to do projects and learn different subjects such as English or science.
