

FACT PRACTICE I

UNIT 5

MATH WORKSHOP

Your Name: _____

When a question says to multiple something by 2, it means to double it.

Ex: 2×2 is the same as $2 + 2$. In this case the answer for both is 4

When multiplying decimals, it is the same thing.

4.5×2 , is the same as $4.5 + 4.5$. The answer for both is nine!

$$\begin{array}{r} 4.5 \\ + 4.5 \\ \hline 9.0 \end{array}$$

Because $4 + 4 = 8$, and 0.5 plus 0.5 is one. Add it all up and you get 9!

Multiple by 2, or "Double" these questions to find the products for each.

$7.2 \times 2 =$

$6.3 \times 2 =$

$1.1 \times 2 =$

$4.6 \times 2 =$

$3.45 \times 2 =$

$0.9 \times 2 =$

$0.13 \times 2 =$

Try multiplying these numbers with decimals by 5.

$7.2 \times 5 =$

$6.3 \times 5 =$

$1.1 \times 5 =$

$4.6 \times 5 =$

$3.05 \times 5 =$

$0.9 \times 5 =$

$0.03 \times 5 =$
