

Nombre: _____

Fecha: _____

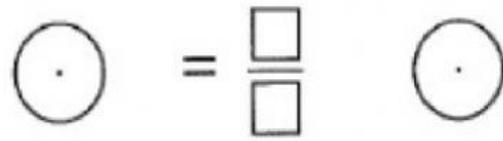

✓ Usa los círculos para calcular las sumas. Redúcelo a la mínima fracción.

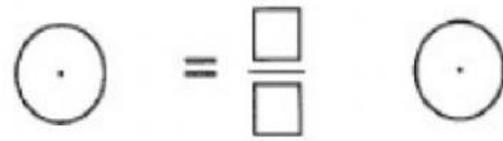

$$\frac{1}{4} + \frac{3}{12} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

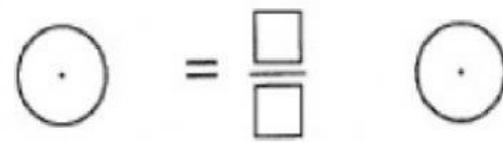

$$\frac{1}{10} + \frac{2}{5} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

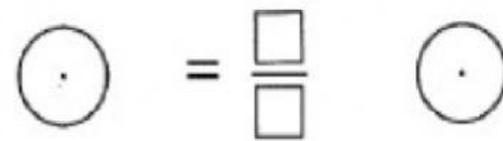

$$\frac{2}{3} + \frac{2}{12} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

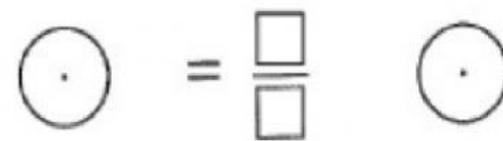

$$\frac{1}{2} + \frac{1}{6} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

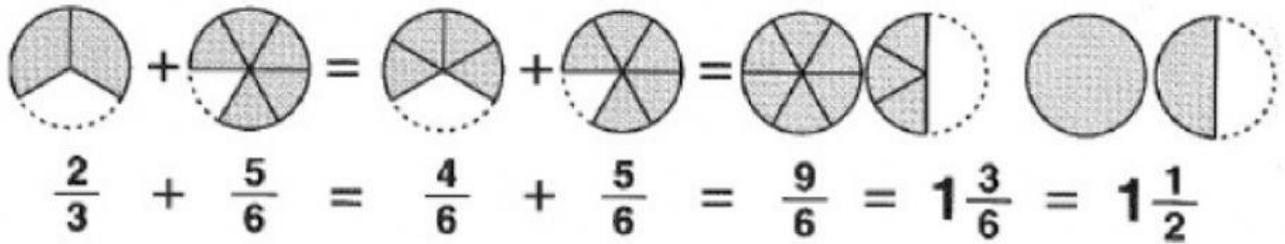

$$\frac{1}{12} + \frac{2}{3} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

$$\frac{1}{6} + \frac{1}{3} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

✓ Usa tus círculos y resuelve las sumas. Expresa el resultado en el mínimo número mixto. Pinta el resultado obtenido.

$$\frac{1}{4} + \frac{7}{8} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square} = \underline{\quad} \bigcirc \bigcirc$$

$$\frac{5}{6} + \frac{1}{3} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square} = \underline{\quad} \bigcirc \bigcirc$$

$$\frac{3}{5} + \frac{7}{10} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square} = \underline{\quad} \bigcirc \bigcirc$$

$$\frac{1}{2} + \frac{3}{4} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square} = \underline{\quad} \bigcirc \bigcirc$$

$$\frac{7}{12} + \frac{2}{3} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square} = \underline{\quad} \bigcirc \bigcirc$$

$$\frac{3}{5} + \frac{9}{10} = \frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square} = \underline{\quad} \bigcirc \bigcirc$$
