

## TRACK 48

Good morning. I'm here today to give you a few tips about security on campus. We're not just here to prevent crime, but to make sure you're safe \_\_\_\_\_ hours a day. One of the services we provide for students who live on campus is to walk home with you if you need to cross the campus late \_\_\_\_\_. I mean, we all know the halls of residence are quite a long way from the \_\_\_\_\_, don't we? So, for example, if you've been studying in the library 'til late and you're nervous about going home \_\_\_\_\_, all you have to do is ring campus security on \_\_\_\_\_ and we'll send someone to make sure you're safe. OK?

By the way, another important thing to remember is the campus emergency number. Umm ... we all know the national emergency number in the UK is \_\_\_\_\_. But when you're on campus ... and there's an emergency, you should call \_\_\_\_\_. If you call \_\_\_\_\_, you'll get through to our own staff, right here on campus. They can react quickly and get to you faster than \_\_\_\_\_ services.

## Track 49

Good evening, everyone. It's great to be here to talk to you about staying safe on holiday. Before I came this evening, I did a little research on where students like to go for their holidays and came up with two continents: \_\_\_\_\_ and \_\_\_\_\_. So, mmm ... I've been looking at the crime figures for both areas, and I thought I'd start by talking a bit about that. Then I'll give you some advice about how to avoid becoming a \_\_\_\_\_ of crime. OK, first of all, let's look at what kinds of crime are committed most in different continents ... Ummm, OK.

I'll start with \_\_\_\_\_. Generally, India isn't thought of as a dangerous place for individuals, but there has been an increase in \_\_\_\_\_ in recent years ... So keep an eye on your \_\_\_\_\_ when you're out in the street. Right. Now let's look at \_\_\_\_\_. Mmmm ...

Of course, you do realize that not all \_\_\_\_\_ countries are the same, but it is true to say that \_\_\_\_\_ are used in a high percentage of crimes across the continent. Looking at the figures, it seems that \_\_\_\_\_ is a serious problem throughout.

#### Track 50

I can see some of you are thinking that it all sounds rather dangerous. But I know lots of people who've been there and had a really great time. They followed advice from the authorities, like making sure they didn't wear \_\_\_\_\_ in the street. And I'd certainly advise anyone travelling to \_\_\_\_\_ to do the same. Another thing you should be careful of, is not to go to \_\_\_\_\_ places at night. But, of course, that's the same anywhere. But I must say, you do have to be very careful in some parts of Latin America when you take your money out of a \_\_\_\_\_. Sometimes, you find that thieves stand very close to people at \_\_\_\_\_ and take their money as it comes out.

#### Track 51

OK ... So, now, I'll finish by talking a little bit about \_\_\_\_\_. I've actually been to India and I didn't have any feeling that it was \_\_\_\_\_ at all. First of all, I went on an organized tour with a group of people. This is definitely the best way to go because it's so much safer. I mean, I didn't go anywhere \_\_\_\_\_ the group, and we had a \_\_\_\_\_ who spoke the local language and knew the area. In fact, I remember now, she warned us not to go off with \_\_\_\_\_, even if they seemed nice and friendly. But, again, you wouldn't do that at home either, would you?
