Got it?
Use the figure at the right. Circle the correct word to complete each sentence.

1. Angles 2 and 6 are examples of (vertical, corresponding) angles.

2. Angles 1 and 8 are examples of alternate (interior, exterior) angles.

3. The angle that is corresponding to angle 8 is angle (3, 4).

4. If lines *m* and *n* are parallel, then angles 3 and (6, 8) have equal measures.
