duplicate	identical	DNA	comparison	radiation
-----------	-----------	-----	------------	-----------

I have never imagined meeting an \_\_\_\_\_

twins. I was frozen in front of how the same they

were. It was impossible to do any \_\_\_\_\_

between both of them because they share the same

\_\_\_\_\_. If we were insisting to

\_\_\_\_\_ a copy, it won't be perfect like this.

But do you think that \_\_\_\_\_ might affect

their DNA? We need to do research about this.
