

Rainbow Fish: Sequencing Activity

Rainbow Fish then gave all the other fish one of his scales.	
The little blue fish was sad and told his friends what happened.	
One day the little blue fish asked Rainbow Fish “Could I please have a scale?”	
Once upon a time, a beautiful fish lived in the ocean, his scales were all the colours of the rainbow.	1
“I won’t give you a scale! Go away!”, said Rainbow Fish. He was very angry.	
The wise old octopus said: “Give every fish one of your shiny scales.”	
Rainbow Fish asked a starfish why no-one liked him anymore.	
Soon Rainbow Fish had only one beautiful scale left, but he had friends and he was happy.	
“Thank you, thank you, thank you”, said the little blue fish.	
The other fish didn’t talk to Rainbow Fish anymore and the rainbow fish was lonely	
“Can I please have a tiny little scale?”, asked the little blue fish for the second time	
Rainbow Fish gave the little blue fish a tiny scale.	
The starfish told Rainbow Fish to go and see the wise old octopus.
