Used to = means something you did in the past.

Scientists used to think that dinosaurs had no living relatives, but now they think that dinosaurs are related to birds.

A Scientists used to think that all dinosaurs had scaly skin, like lizards. Now scientists have found fossils of dinosaurs which had feathers.

C Scientists used to think that there were no poisonous dinosaurs. Recently scientists discovered a dinosaur with teeth like a poisonous snake.

D Scientists used to think that dinosaurs were cold-blooded, like snakes. Then they discovered that dinosaur bones were like the bones of other warm-blooded animals.

B Scientists used to think that dinosaurs had no living relatives. Now scientists think that over millions of years, small dinosaurs became birds.

E Scientists used to think that dinosaurs couldn't climb trees. Then scientists in China discovered small dinosaurs which used their claws to climb trees.

A. Scientists used to think that _____ but now they think that **JURASSIC PARK**

B. Scientists used to think that **JURASSIC PARK** but now they think that _____.

C. Scientists used to think that _____ but now they think that _____.

D. Scientists used to think that _____ but now they think that _____.

E. Scientists used to think that _____ but now they think that _____.

PUZZLE

3D
