Write the Notes in your Notebook or Exercise Book

Agriculture Science

Friends of the farmers

Friends of the farmers are useful plants and animals.

Cows are useful for meat, milk and skins.

Bees are useful for pollinating flowers and for honey.

Earthworms are useful for making air spaces in the soil.

Donkeys are useful for transporting produce.

Fowls are useful for meat, eggs and feathers.

Ladybirds are useful for eating scale insects on plants.

Goats are useful for meat, milk and sports.

LIVEWORKSHEETS

Horses are useful for sports and as a form of transportation.
