

4.2

Information overload

GRAMMAR Approximation

- 1** Read the text. Choose the correct options to complete each sentence.

The faster the better?

Would reading faster enable you to work and action emails quicker? Would it be worth the time spent to learn how to? According to research, most of us read ¹ *approximately* / *odd* 250 to 300 words per minute. Speed-reading courses claim to teach people to read ² *as few as* / *as many as* 1,200 words per minute. That is ³ *roughly* / *as little as* four times as many. Does that mean we could work ⁴ *as many as* / *as much as* four times faster?

The concept of speed reading has been around for ⁵ *as little as* / *about* 60 years but recently, with data being more accessible and bountiful, reading for speed has become more interesting. A Google search for speed-reading courses shows up ⁶ *just*

over / *as few as* 51 million hits. Reading at an average speed, we take ⁷ *or thereabouts* / *around* one to two minutes to read a page or an email. Even if we only doubled this speed it would make us more efficient at work.

Harry Potter and the Deathly Hallows by JK Rowling contains ⁸ *nearly* / *as much as* 200,000 words and an average reader needs eleven hours ⁹ *more or less* / *sort of* to read the book. Reportedly, avid Harry Potter fans can read it in around four hours. In 2007, Anne Jones read this Harry Potter book in 47 minutes and one second and read ¹⁰ *some* / *as much as* 4,251 words per minute to make that world record. Imagine how quickly she would get through a full inbox!

- 3** Complete the sentences to describe the most positive outcome, a, b or c.

- 1** Buy your ticket soon. If you buy it in advance it can cost ...
