

## Unit 5: Numbers to 100 (1)

### 5.1 Addition

1. Write the totals: [3pts]

|            |            |            |
|------------|------------|------------|
| $52 + 6 =$ | $39 + 8 =$ | $83 + 7 =$ |
|------------|------------|------------|

2. Write the totals: [3pts]

|             |             |             |
|-------------|-------------|-------------|
| $35 + 10 =$ | $62 + 30 =$ | $13 + 20 =$ |
|-------------|-------------|-------------|

3. Use the complements to 5 and 10 to work out the complements to 50 and 100: [2pt]

|             |                               |              |                                               |
|-------------|-------------------------------|--------------|-----------------------------------------------|
| $4 + 1 = 5$ | $40 + \underline{\quad} = 50$ | $6 + 4 = 10$ | $\underline{\quad} + \underline{\quad} = 100$ |
|-------------|-------------------------------|--------------|-----------------------------------------------|

4. Add the 3 small numbers together: [2pt]

|               |               |
|---------------|---------------|
| $2 + 6 + 8 =$ | $7 + 1 + 9 =$ |
|---------------|---------------|

### 5.2 Subtraction

5. Find the missing numbers: [3pts]

|            |            |            |
|------------|------------|------------|
| $45 - 3 =$ | $87 - 5 =$ | $68 - 6 =$ |
|------------|------------|------------|

6. Write the totals: [3pts]

|             |             |             |
|-------------|-------------|-------------|
| $36 - 10 =$ | $83 - 30 =$ | $47 - 20 =$ |
|-------------|-------------|-------------|

7. Answer the word problems below: [2pts]

|                                                                                                    |             |
|----------------------------------------------------------------------------------------------------|-------------|
| A baker made 35 chocolate cakes and 25 strawberry cakes. How many cakes did she bake all together? | _____ cakes |
| A dog has 8 puppies. 6 of them are boys. How many are girls?                                       | _____ girls |

### 5.3 Multiplication

8. Complete the table with the missing number sentences: [3pts]

|                          |                   |
|--------------------------|-------------------|
| $5 + 5 + 5 + 5 + 5 = 20$ | $5 \times 5 = 25$ |
|                          | $4 \times 4 = 16$ |
| $10 + 10 + 10 + 10 = 40$ |                   |
|                          | $5 \times 3 = 15$ |

9. Complete the table below with the missing information: [2pts]

| Double         | Addition    | Multiplication    |
|----------------|-------------|-------------------|
| Double 6 is 12 |             | $6 \times 2 = 12$ |
| Double 4 is 8  | $4 + 4 = 8$ |                   |

## 5.4 Division

10. Use the arrays to help solve the division problems: [2pts]

|                                                                                   |                                                                                    |
|-----------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
|  |  |
| $15 \div 5 =$                                                                     | $8 \div 2 =$                                                                       |

11. Find the missing numbers: [3pts]

|                |               |               |
|----------------|---------------|---------------|
| $70 \div 10 =$ | $20 \div 5 =$ | $14 \div 2 =$ |
|----------------|---------------|---------------|

12. Answer the word problems below: [2pts]

|                                                                                            |              |
|--------------------------------------------------------------------------------------------|--------------|
| There are 5 donuts in a box. How many boxes are needed for 15 donuts?                      | ____ donuts  |
| There are 10 children and each child has 3 pencils. How many pencils are there altogether? | ____ pencils |

## Unit 8: Numbers to 100 (2)

### 8.1 Numbers in words, rounding and regrouping

13. Write each of the numbers in words: [2pts]

|                                                                                     |                                                                                      |
|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
|  |  |
|                                                                                     |                                                                                      |

14. Write the numbers: [2pts]

|                     |                  |
|---------------------|------------------|
| Thirty – seven ____ | Forty – six ____ |
|---------------------|------------------|

15. Round to the **nearest 10**: [4pts]

|           |             |             |             |
|-----------|-------------|-------------|-------------|
| $64 = 60$ | $58 =$ ____ | $43 =$ ____ | $65 =$ ____ |
|-----------|-------------|-------------|-------------|

18. Find the missing numbers: [4pts]

|                                                                                   |                           |                            |
|-----------------------------------------------------------------------------------|---------------------------|----------------------------|
|  | $\frac{1}{4}$ of 8 = ____ | $\frac{1}{4}$ of 16 = ____ |
|                                                                                   | $20 \div 4 =$ ____        | $4 \div 4 =$ ____          |

19. Answer the word problems below: [2pts]

|                                                                                                                |                                           |
|----------------------------------------------------------------------------------------------------------------|-------------------------------------------|
| A quarter of a number is 7 what is the number?                                                                 |                                           |
| Duc has 4 apples. He gives 2 to Phuong. What fraction of the apples did he give to Phuong? (select the answer) | $\frac{1}{2}$ $\frac{1}{4}$ $\frac{3}{4}$ |
