## UNIT 5 - WEEK 22

**Exercise 1**: Read and do the tasks. (2.5 ps)

A blizzard is a powerful snowstorm. Low temperatures, strong winds, and large amounts of snow together create this dangerous weather condition. During a blizzard, the driving snow can make it difficult to see far.

During a blizzard the wind blows at speeds of more than 35 miles (56 kilometers) per hour for at least three hours. Visibility (the distance you can see) drops to 0.25 mile (0.4 kilometer) or less. When the weather conditions are bad, main roads and railways may have to be closed, and power and telecommunications lines may stop working.

Blizzards often occur in cold places where winds blow strongly—in Antarctica, for example. However, these storms can happen almost anywhere in the right conditions.

| | YES | NO |
|---|---|---|
| 1. A blizzard is a powerful snowstorm. | ○ | ○ |
| 2. High temperatures create a blizzard. | ○ | ○ |
| 3. During a blizzard, it's difficult to see far. | ○ | ○ |
| 4. The wind blows at speeds of more than 35 miles per hour. | ○ | ○ |
| 5. Blizzards never occur in cold places where wind blows strongly. | ○ | ○ |

LIVEWORKSHEETS

**Exercise 2**: Read again and answer the questions. (3.0 ps)

1. What is a blizzard?

.....

2. Name the conditions that create the blizzard.

.....

.....

3. How fast can the wind blow during the blizzard?

.....

**Exercise 3:** Write about an extreme weather experience. Give details using the senses. (4.5 ps)

- What was the extreme weather you experienced?
- When did it occur?
- How did the extreme weather happen?
- How did you feel?
