

## Activity 5: Work in pairs. Matching the solution with the right reason. Make a conversation.

Solution		Reason
1. Reuse and recycle glass, plastic, paper and other product		a. This helps to reduce the amount of emissions from the burning of petrol in vehicles
2. Reduce use of paper products		b. This helps to save trees and forest since these products are made from wood
3. Cut down on energy use: use LED light bulbs and unplug unused electronic devices		c. These are more efficient, longer lasting and use much less electricity. Even when turned off, electronic devices still use energy
4. Use green methods of transport: ride a bicycle or just walk		d. They absorb carbon dioxide and give off oxygen. A single tree can absorb about one ton of carbon dioxide in its lifetime
5. Plant trees or plants wherever they can grow		e. This helps to reduce waste and pollution, and conserve natural resources
