

Activity 6: Lan, Mai and Minh are talking about the activities presented in 1. Work in group of three. Complete their conversation using the phrases in the box and then practise it.

planting trees reusing and recycling electronic devices carbon dioxide energy use

Lan: Minh, which of these activities do you think are the most effective in reducing global warming?

Minh: In my opinion, the most effective activity is cutting down on (1) _____. If you use LED light bulbs or turn off your (2) _____ when they are not in use, you can save a large amount of electricity.

Lan: Uh-huh. And these things are very easy to do. What about you, Mai?

Mai: I think (3) _____ is the most effective way to help to reduce global warming.

Minh: I'm not so sure about that. What makes you think so?

Mai: It's because trees absorb (4) _____ and give off oxygen. A single tree can absorb about one ton of carbon dioxide in its lifetime. Do you agree with me, Lan?

Lan: Well, I don't think these can reduce global warming significantly. I believe that (5) _____ are more effective, because they can reduce waste and pollution, and conserve natural resources.
