

OPERACIONES COMBINADAS

RESUELVE LOS EJERCICIOS

$$\boxed{9} + \boxed{5} - \boxed{2} = \boxed{}$$

Diagram showing the order of operations for the first exercise. Red lines connect the numbers to intermediate boxes: 9 and 5 connect to a box, then that box and 2 connect to the final result box.

$$\boxed{29} - \boxed{5} + \boxed{7} = \boxed{}$$

Diagram showing the order of operations for the second exercise. Red lines connect the numbers to intermediate boxes: 29 and 5 connect to a box, then that box and 7 connect to the final result box.

$$\boxed{48} + \boxed{7} - \boxed{3} = \boxed{}$$

Diagram showing the order of operations for the third exercise. Red lines connect the numbers to intermediate boxes: 48 and 7 connect to a box, then that box and 3 connect to the final result box.

OPERACIONES COMBINADAS

$$\boxed{36} - \boxed{3} + \boxed{8} = \boxed{}$$

Diagram showing the order of operations for the first problem. Red lines connect the first two numbers (36 and 3) to a box, and the result of that subtraction is connected to the next box (8). The final result is in the last box.

$$\boxed{76} + \boxed{9} - \boxed{4} = \boxed{}$$

Diagram showing the order of operations for the second problem. Red lines connect the first two numbers (76 and 9) to a box, and the result of that addition is connected to the next box (4). The final result is in the last box.

$$\boxed{80} - \boxed{1} + \boxed{6} = \boxed{}$$

Diagram showing the order of operations for the third problem. Red lines connect the first two numbers (80 and 1) to a box, and the result of that subtraction is connected to the next box (6). The final result is in the last box.
