WINTER AT VALLEY FORGE

During the 1700s and 1800s, major fighting during wars generally ceased for the winters and armies took up winter encampments. As winter descended upon Pennsylvania in 1777, General George Washington chose Valley Forge, Pennsylvania, some eighteen miles west of Philadelphia as site of the winter encampment of the Continental Army. The area was far enough away from the British in Philadelphia to discourage surprise attacks and its location between high hills and the Schuylkill River made it easily defensible. The Continental Army, however, was in bad shape. Of the 12,000 soldiers, many lacked the supplies or clothing to survive the winter and many others were starving at this point. At Valley Forge, defense lines were built along with over 1,000 huts to provide some relief from the brutal elements.

Moisture from rain and melting snow made it impossible for many soldiers to stay dry and allowed for the spread of disease. The only reliable food that the soldiers received was a mixture of flour and water known as "fire cake". Occasionally, soldiers received meat and bread. Furthermore, many soldiers had inadequate supplies of clothing and were forced to endure the winter in tatters and without blankets. Many lacked shoes. Wounded soldiers often died from exposure to the elements. Unsanitary and crowded conditions led to the proliferation of diseases and sicknesses. On February 23, 1778, former German General Baron von Steuben arrived at Valley Forge to train the Patriots how to march in formation, fire guns quickly, use bayonets and become soldiers.

Though von Steuben spoke little English, he developed a training manual in French that would be translated on the grounds into English. Unlike many American generals, von Steuben worked directly with the soldiers, endearing him to the thousands suffering at Valley Forge. Von Steuben's presence did much to improve the morale of the army during the bitter winter and also helped them develop into a more tactical, effective military machine, capable of fighting the British. On June 19, 1778, the Continental Army left Valley Forge in pursuit of the British who were moving north to New York.

Read the following passage and mark the letter A, B, C, or D to indicate the correct answer to each of the questions from 44 to 50.

Insects' lives are very short and they have many **enemies**, but they must survive long enough to breed and perpetuate their kind. The less insect-like they look, the better their chance of survival. To look "inedible" by imitating plants is a way frequently used by insects to survive. Mammals rarely imitate plants, but many fish and invertebrates do.

The stick caterpillar is well named. It is hardly distinguishable from a brown or green twig. This caterpillar is quite common and can be found almost anywhere in North America. It is also called "measuring worm" or "inchworm". It walks by arching its body, then stretching out and grasping the branch with its front feet then looping its body again to bring the hind feet forward. When danger threatens, the stick caterpillar stretches its body away from the branch at an angle and remains rigid and still, like a wig, until the danger has passed.

Walking sticks, or sticks insects, do not have to assume a rigid, twig-like pose to find protection; they look like inedible twigs in any position. There are many kinds of walking sticks, ranging in size from the few inches of the North American variety to some tropical species that may be over a foot long. When at rest their front legs are stretched out, heightening their camouflage. Some of the tropical species are adorned with spines or ridges, imitating the thorny bushes or trees in which they live.

Leaves also seem to be a favourite object for insects to imitate. Many butterflies can suddenly disappear from view by folding their wings and sitting quietly among the plants that they resemble.

44. What is the main idea of the passage?

- A. Caterpillars that live in trees
- B. The feeding habits of insects
- C. How some insects imitate plants to survive
- D. Insects that are threatened with extinction

45. Which of the following does the word "**enemies**" in line 1 refer to

- B. extreme weather conditions
- C. creatures that eat insects
- D. insects looking like plants

46. According to the passage, how does the stick caterpillar make itself look like a twig?

- A. By looping itself around a stick
- B. By holding its body stiff and motionless
- C. By changing the colour of its skin
- D. By laying its body flat against a branch

47. Which of the following is true of stick insects?

- A. They resemble their surroundings all the time.
- B. They make themselves look like other insects.
- C. They are camouflaged only when walking.
- D. They change colour to make themselves invisible.

48. According to the passage, which of the following is NOT true about the stick caterpillar?

- A. It is not popular in North America.
- B. It changes its colour to avoid danger.
- C. It can have different size.
- D. The tropical caterpillars can have parts of their body looking like thorns.

49. How can butterflies make themselves invisible?

- A. By hiding under the leaves
- B. By folding wings and sitting still among the leaves with similar colours
- C. By disappearing from the view
- D. By flying among colourful flowers
