

Converting Mixed Numbers to Improper Fractions

Instruction: Convert the mixed numbers into improper fractions.

$$9\frac{1}{9} = \text{---} \quad 3\frac{8}{9} = \text{---} \quad 8\frac{7}{12} = \text{---} \quad 7\frac{7}{9} = \text{---}$$

$$3\frac{11}{15} = \text{---} \quad 3\frac{2}{5} = \text{---} \quad 4\frac{2}{7} = \text{---} \quad 7\frac{1}{3} = \text{---}$$

$$5\frac{1}{7} = \text{---} \quad 2\frac{7}{10} = \text{---} \quad 3\frac{4}{5} = \text{---} \quad 4\frac{5}{7} = \text{---}$$

$$3\frac{3}{8} = \text{---} \quad 6\frac{1}{8} = \text{---} \quad 5\frac{5}{6} = \text{---} \quad 7\frac{4}{15} = \text{---}$$

$$4\frac{2}{9} = \text{---} \quad 9\frac{1}{6} = \text{---} \quad 7\frac{5}{8} = \text{---} \quad 1\frac{5}{9} = \text{---}$$
