

Converting Improper Fractions to Mixed Numbers

Instruction: Convert the improper fractions into mixed numbers.

$$\frac{32}{9} = \text{ — } \quad \frac{67}{12} = \text{ — } \quad \frac{116}{15} = \text{ — } \quad \frac{34}{15} = \text{ — }$$

$$\frac{25}{12} = \text{ — } \quad \frac{41}{6} = \text{ — } \quad \frac{53}{7} = \text{ — } \quad \frac{25}{4} = \text{ — }$$

$$\frac{127}{15} = \text{ — } \quad \frac{21}{8} = \text{ — } \quad \frac{15}{4} = \text{ — } \quad \frac{33}{10} = \text{ — }$$

$$\frac{25}{9} = \text{ — } \quad \frac{38}{7} = \text{ — } \quad \frac{99}{10} = \text{ — } \quad \frac{44}{5} = \text{ — }$$

$$\frac{53}{15} = \text{ — } \quad \frac{41}{8} = \text{ — } \quad \frac{64}{9} = \text{ — } \quad \frac{57}{10} = \text{ — }$$
