

PECAHAN

cikgu fatimah

Menambah pecahan dengan penyebut yang sama

Contoh : $\frac{1}{5} + \frac{1}{5} =$ $\frac{1+1}{5}$ $\frac{2}{5}$	1. $\frac{1}{4} + \frac{2}{4} =$
2. $\frac{3}{6} + \frac{2}{6} =$	3. $\frac{1}{5} + \frac{2}{5} =$
4. $\frac{3}{8} + \frac{2}{8} =$	5. $\frac{4}{10} + \frac{3}{10} + \frac{2}{10} =$
6. $\frac{2}{7} + \frac{3}{7} + \frac{1}{7} =$	7. $\frac{5}{18} + \frac{4}{18} + \frac{2}{18} =$

Selamat mencuba, anda boleh!!

PECAHAN

cikgu fatimah

Menambah pecahan sama penyebut dan jawapan dalam pecahan termudah.

<u>Contoh:</u> $\frac{1}{4} + \frac{1}{4} = \frac{1+1}{4} = \frac{2}{4} = \frac{2 \div 2}{4 \div 2} = \frac{1}{2}$	1. $\frac{3}{6} + \frac{1}{6} =$
2. $\frac{3}{8} + \frac{1}{8} =$	3. $\frac{1}{9} + \frac{5}{9} =$
4. $\frac{2}{9} + \frac{1}{9} =$	5. $\frac{2}{10} + \frac{1}{10} + \frac{3}{10} =$
6. $\frac{2}{12} + \frac{3}{12} + \frac{1}{12} =$	7. $\frac{5}{16} + \frac{5}{16} + \frac{1}{16} =$

Selamat mencuba, anda boleh!!!

PECAHAN

Menambah pecahan dengan nombor bulat.

CONTOH: 1

$$\frac{1}{5} + 3 =$$

$$3\frac{1}{5}$$

CONTOH: 2

$$6 + \frac{1}{4} + \frac{2}{4} = 6\frac{3}{4}$$

$$6 + \frac{1+2}{4} = 6\frac{3}{4}$$

1.

$$\frac{3}{6} + 5 =$$

2.

$$10 + \frac{2}{5} =$$

3.

$$\frac{3}{8} + 6 =$$

4.

$$\frac{4}{10} + 2 + \frac{1}{10} =$$

5.

$$\frac{2}{7} + \frac{3}{7} + 3 =$$

6.

$$4 + \frac{4}{18} + \frac{1}{18} =$$

Selamat mencuba, anda boleh!!

PECAHAN

Menambah pecahan dan nombor bulat, penyebut yang sama.

cikgu fatimah

Jawapan dalam pecahan termudah

Contoh : $2\frac{1}{4} + 3\frac{1}{4} = 5\frac{2}{4}$ $3 + 2 + \left(\frac{1}{4} + \frac{1}{4}\right) = 5\frac{2}{4}$ $5\frac{2 \div 2}{4 \div 2} = 5\frac{1}{2}$	1. $2\frac{1}{5} + 4\frac{2}{5} =$
2. $3\frac{3}{6} + 1\frac{1}{6} =$	3. $4 + 2\frac{2}{6} + \frac{1}{6} =$
4. $2 + \frac{2}{8} + 2 =$	5. $\frac{4}{10} + 4 + \frac{1}{10} =$

Selamat mencuba, anda boleh!!!
