

Whose FISH are these?

Albert Einstein created a tricky little puzzle. See if you can solve it!

It is not that easy! Actually, it is said that only 2% of the people who try this puzzle can find the answer in under 15 minutes!

There are five houses. Each house is a different color. Each house has a family from a different country. Each family drinks a different beverage, plays different sports and owns a different pet.

Fill in the table below and try to find out which family keeps FISH as pets.
