

The table shows weather data collected over a three-day period.

| Day | Temperature (°F) | Wind Speed (mph) | Wind Direction | Humidity |
|-----|------------------|------------------|----------------|----------|
| 1 | 31 | 15 | west | 67% |
| 2 | 34 | 6 | north | 98% |
| 3 | 42 | 5 | west | 92% |

Which of the following **best** explains why there was a greater chance of precipitation on day 2 than on day 1?

- ☐ A. Day 1 had stronger winds.
- ☐ B. Day 2 had higher humidity.
- ☐ C. Day 1 had colder temperatures.
- ☐ D. Day 2 had more wind from the north.
