

Adding & Subtracting Unlike Fractions

PRACTICE:

Add or subtract the following fractions.

$$1) \frac{\boxed{3}}{\boxed{5}} + \frac{\boxed{3}}{\boxed{8}} = \frac{\boxed{}}{\boxed{}}$$

$$2) \frac{\boxed{2}}{\boxed{7}} + \frac{\boxed{1}}{\boxed{4}} = \frac{\boxed{}}{\boxed{}}$$

$$3) \frac{\boxed{2}}{\boxed{5}} + \frac{\boxed{1}}{\boxed{2}} = \frac{\boxed{}}{\boxed{}}$$

$$4) \frac{\boxed{3}}{\boxed{5}} + \frac{\boxed{1}}{\boxed{3}} = \frac{\boxed{}}{\boxed{}}$$

$$5) \frac{\boxed{2}}{\boxed{6}} - \frac{\boxed{1}}{\boxed{4}} = \frac{\boxed{}}{\boxed{}}$$

$$6) \frac{\boxed{5}}{\boxed{7}} - \frac{\boxed{2}}{\boxed{3}} = \frac{\boxed{}}{\boxed{}}$$

7) $\frac{\boxed{1}}{\boxed{2}} - \frac{\boxed{1}}{\boxed{5}} = \frac{\boxed{}}{\boxed{}}$

8) $\frac{\boxed{7}}{\boxed{10}} - \frac{\boxed{1}}{\boxed{4}} = \frac{\boxed{}}{\boxed{}}$

9) $\frac{\boxed{6}}{\boxed{7}} - \frac{\boxed{2}}{\boxed{3}} = \frac{\boxed{}}{\boxed{}}$

10) $\frac{\boxed{3}}{\boxed{8}} + \frac{\boxed{3}}{\boxed{4}} = \frac{\boxed{}}{\boxed{}}$
