

CELLULAR TRANSPORT: complete using the information discussed in class.

Types of cellular transport:

1.

2.

Types of passive transport:

1.

2.

3.

What happens in:

1. Facilitated diffusion:

2. Diffusion:

3. Osmosis:

What happens to the cells in:

1. Isosmotic solutions:

2. Hypertonic solutions:

3. Hypotonic solutions:

Types of active transport:

1.

2.

3.

What happens in:

1. Endocytosis:

2. Exocytosis:
