LICEO ALBONOR BILINGUAL EDUCATIONAL UNIT

SCIENCE 2ND PARTIAL 2ND QUIMESTER TEST

PERIOD 2021-2022

STUDENT'S NAME: _____

GRADE: _____

TEACHER: Mrs. Lourdes Velez

DATE: _____

RECOMMENDATIONS

1. The online evaluation lasts 40 minutes.
2. Read carefully each statement contained in the online assessment
3. Avoid any attempt of academic dishonesty, in case of incurring in it, it will be sanctioned according to the LOEI articles 223 - 226.
4. During the test, if you have questions, write them in the Zoom chat so that the teacher can help you. Do not activate your microphone during the online assessment.
5. Upload the procedures requested in the assessment in the assignment provided on the Idukay platform.
6. Be clear and specific when writing your answers.

Good luck!

1.- LOOK AND LABEL THE PICTURES WITH THE CORRECT WORDS. (2.50 MARKS)

flood lava landslide ash river

_____

_____

_____

_____

_____

LIVEWORKSHEETS

Lesson 1. How can Earth's surface change rapidly?

2.- READ AND COMPLETE THE STATEMENTS USING THE KEY WORDS FROM THE BOX.

(2.50 MARKS)

Earth's Moving Plates

Key words

- Plates
- Earthquakes
- Mantle
- Earth's
- crust

Earth's outer crust rests on top of another layer called the mantle. The _____and the top of the mantle are divided into very large pieces called plates. The plates move all the time. This movement can cause rapid changes in Earth's surface. Volcanoes and _____often occur along or near places where the plates come together.

The picture shows an area in Iceland where two plates are moving away from each other. Since Iceland is on top of these two pates, it has many volcanoes and earthquakes.

1. The Earth's crust is a layer that rests above the_____.

2. _____are division of the Earth's crust and the top of the mantle.

3. Rapid changes in_____surface can be caused by the movement of plates.

3. READ AND COMPLETE THE NEXT TEXT ABOUT VOLCANOES. (2.50 MARKS)

tsunamis - magma - ash - landform - lava

Volcanoes

A volcano is a _____that forms at an opening in Earth's crust where magma reaches the surface.

When a volcano erupts, the magma reaches the surface and is called_____. The temperature and the kind of rock

that makes up the _____determine the type of eruption. Sometimes the pressure builds up so that the gases in the magma explodes. Hot rocks, gases, _____, and other particles burst from the openings, called vents.

Lava and ash can spread over a wide area. The volcano and surrounding area may be reshaped. An eruption can also cause floods, landslides, and_____, which are huge ocean waves.

LIVEWORKSHEETS

4.- READ AND MATCH ABOUT WHERE IS EARTH'S WATER. (2.50 MARKS)

1.- Ocean and Seas

The ocean is a large body of salt water

Seas are smaller areas of the ocean that

are partly surrounded by land.

2.- Lakes and Ponds

Land surrounds lakes and ponds, which

are smaller than the ocean. Lakes are

generally larger than ponds. Almost all

lakes and ponds contain fresh water, but

a few lakes and ponds contain salt water.

3.- Rivers

A river is flowing fresh water. Water in

rivers moves downhill. Rivers flow into

the ocean, lakes, and other rivers.

4.- Glaciers and Ice Caps

A glacier is a large body of slowly

Moving ice. Glaciers form when more

Snow falls than melts in an area. The

Polar ice caps are large areas of ice

Of the North and South Poles.

5.- Groundwater

Groundwater is any water that is underground

Groundwater fills the spaces and cracks

In underground rocks and soils
