| Question 24: A. any | B. little | C. less | D. some |
| Question 25: A. importance | B. important | C. unimportant | D. importantly |

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the following questions.

Mercury is the smallest member of the sun's family which is only 3,100 miles across. It is also the sun's **swiftest** planet. Its yearly journey round the sun is only 85 days.

Mercury always keeps one side towards the sun. On this side it is always day, on the other side it is always night. We only see the lighted side.

Mercury appears to us like a yellowish orange star. The nearest planet to the sun, it is always seen near the sun, either just before sunrise or soon after sunset. People sometimes call Mercury the morning star or evening star. Mercury is half the size of the earth. Because it is much lighter, **it** has much less gravity. If you can visit Mercury in a spaceship, you will find it a strange world. Its low gravity makes you feel very light. If your weight on earth is 100 pounds, your weight on Mercury is only 27 pounds. Looking at the sun from Mercury, you can see that it's much more brilliant than it is seen from the earth. And the yellow centre of the sun appears three times bigger from Mercury. On the lighted side, Mercury's temperature is about 300 degrees centigrade. But the dark side is extremely cold, 150 degrees below zero so Mercury is probably the coldest as well as the hottest of the planets.

Question 26: The word **swiftest** in paragraph 1 is closest in meaning to _____.

- A. fastest
- B. coldest
- C. hottest
- D. biggest

Question 27: We cannot see the dark side of Mercury because _____.

- A. it moves very fast
- B. it always appears just before sunrise or soon after sunset
- C. it always keeps one side towards the sun
- D. it is too far for us to see

Question 28: On the lighted sight, the Mercury's temperature is _____.

- A. zero degree centigrade
- B. 85 degrees centigrade
- C. 100 degrees centigrade
- D. 300 degrees centigrade

Question 29: The word "**it**" in paragraph 4 refers to _____.

- A. Mercury
- B. the sun
- C. gravity
- D. the earth

Question 30: What is the passage mainly about?

- A. Members in Solar system
- B. Mercury
- C. Gravity
- D. Solar system

THE END
