

Interpreting data

Location	Creatures	Number of creatures
Site 1: Footpath	Ants	50
	Caterpillars	0
	Beetles	5
Site 2: Playing field	Ants	25
	Caterpillars	1
	Beetles	8
Site 3: Flowerbed	Ants	10
	Caterpillars	30
	Beetles	10

Example:

There are more ants at site 1 than at sites 2 and 3.

Ants seem to prefer to live on the footpath and playing field.

They don't seem to like to live on the flowerbed.

Write in small letters.

There are more caterpillars at site _____ than at sites _____ and _____.

Caterpillars seem to prefer to live on the _____. They do not seem to like living on the _____ or the _____.

Word Bank

1 2 3 footpath caterpillars
flowerbed playing field beetles

There are more _____ than _____ in the habitats we investigated. Beetles seem to like all three sites. We found beetles on the footpath, on the playing field and in the flowerbed. We did not find as many _____ as _____. For example, at site 1 we found _____ ants but only _____ beetles.
