

1. Before you listen to the song, try to complete each line with the correct word. Then listen to the song and check whether your choice matches the song.

It can be born **in you / anywhere**
In the last place you'd expect
In a way you'd never **dream / thought**

It can grow from **nothing / your heart**
And blossom in a second
A single glance is all it takes
To get inside you

Invading every **thought / place**
And every beat of your **soul / heart**
Love can make you **scream / happy**
And it can leave you **breathless / speechless**
Love has a thousand stems
But only one flower

It can grow **lonely / alone** 'til it turns to dust
It can tear your world apart or bind to you forever
It can grow in **light / darkness**, make its own **light / darkness**
Turn a curse into a kiss
Change the meaning of your **words / world**

Love **brings / makes** no sense, love has no name
Love drowns you in tears and it sets your heart on fire
Love has no fear, love has no **reason / doubt**
So infinitely vast and we're standing at the edge
Take my hand, erase the **love / past** forever
My love is you, my love you are

Love **brings / makes** no sense, love has no name
Love is never wrong and never needs a reason
I'm drowning in my tears but my heart's on fire

It can make you **bitter / better**, it can change you slowly
And give you everything you want, ask for nothing in return
In the blink of an eye, the hint of a **stare / smile**
In the way you say goodbye, and everytime you find me

2. Write down a new stanza for the song, describing what *Love* means to you.
