The text is for questions 6 to 10.

Good and Bad Effect of Television

Television becomes part of our life. Everyday we watch television. We usually watch television after working, getting together with our family, even when we are working. As the part of our life, television has bad and good effects. People have different opinions about the negative and positive impacts of watching TV.

The bad effects most people say are TV makes us lack of movement. We stay for a long time in our TV. It's not healthy life. They also say that TV influences our daily life. Sometimes we don't realize that we become more consuming after watching various ads. Some TV shows influence the way children act. The rudeness and violence come to our house without permission through television.

But, the other people say that television has a good impact. We can get much information from TV. When there is something happened in another city, we know directly, fast through the news on TV. TV also makes us relax. After working all day, we come home and turn on TV to watch funny and comedy videos.

The text is for questions 11 to 15.

Most people eat fast food. Everyone has heard people say how fast food is either great or horrible. As with everything people say, there is usually some truth to it. We will go over the advantages and disadvantages of fast food.

Here are the advantages of fast food. First, you can save money because fast food tends to be cheaper than the homemade meals

and dine-in restaurant. This may be the common reason why teens like to eat fast food. Second, you can also save time as there is very low or no waiting time for food to be served. There is very low or no waiting period because the food is usually prepared in just a few minutes. Besides, fast food can be found almost everywhere, which raises its popularity.

However, fast food also has disadvantages. There are two main disadvantages we'll take a look at. First, there's no doubt that fast food is made in a large scale production process. It tends to lower the overall quality of food. Second, fast food has been very fattening. The production process involved in creating fast food added a lot of greasy and fat content to foods.

In conclusion, fast food restaurants and industry as a whole have come a long way. They may save our money and time, but it may give us bad health impacts in the future. Wisely speaking, it is okay to eat fast food sometimes, and not make it as the main source of food.

11. What is the text about? **HOTS**
