.....

4. Dolphin is an intelligent animal. They have their own language.

.....

5. She has a cup. It is very nice.

.....

VI - Read. Check T for True and F for False.

All about Tornadoes

Tornadoes happen all over the world. Tornadoes have high wind speeds and are very dangerous. They form when warm air and cold air come together. The wind from the air makes a funnel. The twisting air stands up. The warm air moves up and cool air moves down. When the funnel touches the ground, it becomes a tornado. Computers show where the wind is the strongest. If you see a tornado, you should find shelter to stay safe!
