

## LEMBAR KEGIATAN BELAJAR

Materi : Luas Segitiga  
Tujuan Belajar : Peserta didik dapat menghitung luas segitiga dengan tepat.

Amati video berikut :

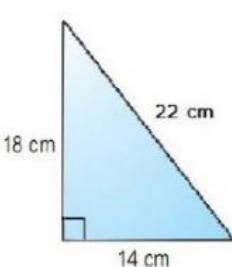

Tentukan luas segitiga dari gambar !

1.

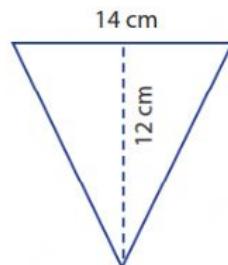

$$\begin{aligned} Ls &= \frac{1}{2} \times \text{alas} \times \text{tinggi} \\ &= \frac{1}{2} \times \dots \times \dots \\ &= \frac{1}{2} \times \dots \\ &= \dots \text{ cm}^2 \end{aligned}$$

2.

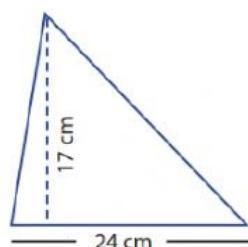

$$\begin{aligned} Ls &= \frac{1}{2} \times \text{alas} \times \text{tinggi} \\ &= \frac{1}{2} \times \dots \times \dots \\ &= \frac{1}{2} \times \dots \\ &= \dots \text{ cm}^2 \end{aligned}$$

3.

$$\begin{aligned} Ls &= \frac{1}{2} \times \text{alas} \times \text{tinggi} \\ &= \frac{1}{2} \times \dots \times \dots \\ &= \frac{1}{2} \times \dots \\ &= \dots \text{ cm}^2 \end{aligned}$$

4.

$$\begin{aligned} Ls &= \frac{1}{2} \times \text{alas} \times \text{tinggi} \\ &= \frac{1}{2} \times \dots \times \dots \\ &= \frac{1}{2} \times \dots \\ &= \dots \text{ cm}^2 \end{aligned}$$

5.

28 cm

15 cm

$$L_s = \frac{1}{2} \times \text{alas} \times \text{tinggi}$$

$$= \frac{1}{2} \times \dots \times \dots$$

$$= \frac{1}{2} \times \dots$$

$$= \dots \text{ cm}^2$$
