1 The original of these were a type of sandal worn in ancient Egypt. But the modern version originated in Japan. They aren't <sup>1</sup> so you don't need a lot of money if you want to buy a pair. Adults and children can wear them indoors or outdoors and they feel very <sup>2</sup>, but don't try running in them!

2 This item was designed and made in Britain in 1932. At first, it was <sup>1</sup> because the shape was new and strange. But since then it has become <sup>2</sup> all over the world with students, artists, people who work in offices and anybody who needs a good light to see what they're doing. It's <sup>3</sup> because you can put it in almost any position.

3 It's a <sup>1</sup> design that everyone recognises and the shape was first used for the clocks on railway stations in Switzerland. It's a <sup>2</sup> round shape and this is the reason for its success.

4 This is made of metal and you can put candles inside it. Its straight lines and curves, and the <sup>1</sup>, intricate metalwork, make it an <sup>2</sup> object in any home.
