Thursday, December 4th when a high-pressure system (warm air) cover southern England. With the freezing-cold air below, heavy fog formed. Pollution from factories, cars, and coal stoves mixed with the fog. The humidity was terribly high; there was no breeze at all. Traffic (cars, trains, and boats) stopped. People couldn't see, and some walked onto the railroad tracks or into the river. It was hard to breathe, and many people got sick. Finally on Tuesday, December 9th, the wind came and the fog went away. But after that, even more people got sick, many of them died.
