

RHOMBUS

1) Fill in the blanks for each of the following rhombuses.

<p>a)</p> 	<p>$AB = BC = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$</p> <p>$\angle ABC = \angle \underline{\hspace{2cm}}$</p> <p>$\angle DAB = \angle \underline{\hspace{2cm}}$</p>
<p>b)</p> 	<p>$UV = \underline{\hspace{2cm}} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$</p> <p>$\angle s = \angle \underline{\hspace{2cm}}$</p> <p>$\angle t = \angle \underline{\hspace{2cm}}$</p>
<p>c)</p> 	<p>$\angle w = 180^\circ - \underline{\hspace{2cm}}^\circ$</p> <p>$= \underline{\hspace{2cm}}^\circ$</p> <p>$\angle y = \underline{\hspace{2cm}}^\circ$</p> <p>$\angle z = \underline{\hspace{2cm}}^\circ$</p>

2) Fill the unknown marked angle(s) in each of the following rhombuses.

a) Find $\angle p$

$$\angle p = \underline{\hspace{2cm}}^\circ$$

b) Find $\angle q$

$$\angle q = \underline{\hspace{2cm}}^\circ$$

c) Find $\angle r$

$$\angle r = \underline{\hspace{2cm}}^\circ$$

d) Find $\angle s$

$$\angle s = \underline{\hspace{2cm}}^\circ$$

e) Find $\angle u$ and $\angle t$

$$\angle u = \underline{\hspace{2cm}}^\circ$$

$$\angle t = \underline{\hspace{2cm}}^\circ$$

f) Find $\angle v$

$$\angle v = \underline{\hspace{2cm}}^\circ$$
