

Sound

1. Sound is:

a) a wave or vibration b) the ability to do work

2. Sound travels through :

a) instruments b) solid, liquid and gas

Choose the position in which the "Homemade telephone" CAN'T work

Put in order the steps of how a sound travels

1.Starts with a mechanical movement	2. The movement causes vibrations	3.This causes molecules to vibrate	4.The vibrations of the molecules helps sound to travel
