**Temperature - Weather - Humidity - Precipitation - Wind**

_____ is the condition of our atmosphere.

It has four basic elements:

a) _____ : the amount of heat in the air

b) _____ : the movement of air

c) _____ : amount of water vapour in the air

d) _____ : water in liquid or solid form that falls from the air to the ground

**midday**

**hot**

**sunrise**

**warm**

**thermometer**

**sunset**

**cool**

**cold**

LIVEWORKSHEETS

**Temperature** can be _____ , _____

, _____ or _____

Temperatures are higher at _____ and

they are lower at _____ (in the morning)

and at _____ (in the evening)

We use a _____ to measure temperature

in degrees Celsius (°C)

**wind speed**

**anemometer**

**wind direction**

**wind vane**

**Wind** has got two components:

a) _____: caused by air moving from a high pressure area to an area of low pressure.

b) _____ : how fast or slow the wind moves.

We use a _____ to show wind direction using cardinal points (North-South-East-West)

LIVEWORKSHEETS

We use an _____ to measure wind speed

in kilometres per hour (km/h)

**dry**

**hygrometer**

**humid**

**Humidity** is the amount of water vapour in the air. If it has a lot of water vapour, it is _____, if there is low humidity, it is _____

We use a _____ to measure the relative humidity as a percentage (%)

LIVEWORKSHEETS

sleet

ground

rain

hail

snow

**Precipitation** is water in liquid or solid form that falls from the air to the _____. It can fall in four forms:

a) _____

b) _____

c) _____

d) _____
