The text is for questions number 29 to 31.

One day Mother Duck and her little ducklings were on their way to a lake. The ducklings were happy following their mother and quack quacking along the way. All of sudden Mother Duck saw a fox at a distance. She was frightened and shouted "Children, hurry to the lake. There's a fox!"

The ducklings hurried towards the lake. Mother Duck wondered what to do. She began to walk back and forth dragging one wing on the ground. When the fox saw her, he became happy. He said to himself, "It seems that she's hurt and can't fly! I can easily catch and eat her!" Then he ran towards her.

Mother Duck ran, leading the fox away from the lake. The fox followed her. Now he wouldn't be able to harm her ducklings. Mother Duck looked toward her ducklings and saw they had reached the lake. She was relieved so she stopped and took a deep breath. The fox thought she was tired and he came closer but Mother Duck quickly spread her wings and rose up in the air. She landed in the middle of the lake and her ducklings swam to her.

The fox stared in disbelief at Mother Duck and her ducklings. He could not reach them because they were in the middle of the lake. This way, she fooled her enemy thinking she was hurt. When the enemy followed her, her children had some time to escape

8. How can readers benefit from the text?

 <p>Dragonflies are any group of roughly 3,000 species of aerial predatory insects. They are most commonly found near freshwater habitats throughout most of the world. However, habitat degradation has reduced dragonfly populations across the world. Dragonfly species have long bodies with two narrow pairs of intricately veined. They have membranous wings that, while generally transparent, may have colored markings. Dragonflies also have huge bulging eyes that occupy most of the head. The eyes give some a field of vision approaching 360 degrees.</p> <p>.... (paragraph 3)</p> <p>Dragonflies exhibit a mating posture unique to the Odonata. The male and female contort themselves into the "wheel" position before sperm is transferred.</p>	 <p>Coccinellidae is a widespread family of small beetles ranging in size from 0.8 to 18 mm. The family is commonly known as ladybugs in North America and ladybirds in Great Britain and other parts of the English-speaking world. Coccinellids are often noticeably colored yellow, orange, or red with small black spots on their wing covers. They have black legs, heads, and antennae. Most coccinellids have round to elliptical, dome-shaped bodies with six short legs.</p> <p>.... (paragraph 3)</p> <p>The atlas Ladybirds (Coccinellidae) of Britain and Ireland published in 2011 showed a decline of more than 20% in native species. The decline is a result of environmental changes and competition from foreign invaders.</p>

I see your monsters

I see your monsters I see your pain
Tell me your problems
I'll chase them away
I'll be your lighthouse
I'll make it okay
When I see your monsters
I'll stand there so brave
And chase them all away

In the dark we we
We stand apart we we
Never see that the things that we need are
staring right at us
You just want to hide hide hide
Hide never show your smile smile
Stand alone when you need someone it's
the hardest thing of all
That you see are the bad bad bad
Bad memories take your time and you'll
find me
