

I really like to go on vacation with my family and friends.

They are the best because my mom always chooses great places to go and we have lots of fun wherever we go.

In some occasions we travel to the beach and some others we travel to highlands. I prefer to go on an airplane. My little brother gets scared when the airplane starts moving but then he relaxes when he sees the view through the window. It is amazing how the clouds look like cotton candy. And houses and buildings look so tiny.

My father enjoys the food of every place we visit. And I laugh when mom tells him not to eat everything on the road. I can wait to see where we are going now. I hope to see wild animals or maybe to swim with sharks in the ocean. Anyway I am sure we will have a great moment because we will be together.

The End
