

CYBER CRIME

Read the passage /text A ,B ,C and match them with its crime name type: (dropdown list)

READING A	READING B	READING C
A man was jailed last week for copying thousand of credit cards. Monty was the leader of a gang of criminals who added a special hidden machine to cash machines at petrol station. The tiny machine copied the information from the credit cards that people put into the machines. The gang then made copies of cards and used to buy things in shops and on the internet. They also put the cards into cash machines and took money from people's bank accounts. Monty had copied 35000 cards and had stolen over \$ 720000.	< you are awesome > was an email message that people were delighted to receive. It was sent to thousands of people on the morning of 4 May 2000. But it contained a virus! When they opened the email, the virus went to everyone in their address book. It quickly spread around the world, and caused terrible damage to hundreds of computer systems. Most large organizations, including the British government, had to close their email systems to get rid of it. A Filipino computer programmer had written the virus. The police arrested him, but at that time it wasn't a crime to write computer viruses, so they had to let him go.	Sam Jenkins was astonished when she discovered that her bank account was empty. Just two weeks before there had been \$15000 in it. The bank told her that she had moved the money herself to a new account with another bank. A month before, Sam had received an email which asked her to give personal information such as bank account details, passwords, and PIN numbers. She thought the email was from her bank, but it wasn't. The person who sent it used the information to steal Sam's identity and open a new bank account. They then moved Sam's money into the new account, took the money out, and closed the account. Sam still doesn't know who sent the fake email.

Choose the correct option:
