

WRITING SKILL REVIEW - USING PRONOUNS TO AVOID REPETITION:

Repeating the same word can make your writing less natural. One way to avoid this is to use pronouns, such as *it*, *they*, or *one*, to refer to a noun used earlier.

Rewrite the second sentence in the space. Replace the underlined noun with a suitable pronoun.

31. Professor Charles Babbage is sometimes called the "Father of Computing." Babbage designed two mechanical computers in the nineteenth century.
-
32. ENIAC was one of the world's first electronic computers. ENIAC was built between 1943 and 1946.
-
33. Transistors were first invented in the late 1940s. Transistors allowed computers to become smaller, faster, and more reliable.
-
34. Integrated circuits were another important invention in the history of computing. Without integrated circuits, modern computers would not be possible.
-
35. Since the days of Babbage, computers have become more powerful and more useful. Even a basic computer today has more computing power than the most powerful machine in the 1960s.
-
