

A biker with a mass of 75 kg moves along the path with a constant velocity of 5 m/s. What is the biker's momentum?

- A) 375 kg m/s   B) 265 kg m/s   C) 73.5 kg m/s   D) 425 kg m/s

Which will take more time to catch?

- a) bowling ball because it has less momentum
- b) bowling ball because it has more momentum
- c) ping pong ball because it has more momentum
- d) both require the same amount of force when catching

A 5 N force is applied to a 3 kg ball to slow it down from 9 m/s to 3 m/s. What is time for impulse on the ball?

- a) 4 sec
- b) 3.6 sec
- c) 2.9 sec
- d) 6 sec

A boy kicks a football with a force of 20 N, the time the force acts for is 0.3 s.

Calculate the impulse on the ball

- a) 1.22 Ns
- b) 2 Ns
- c) 6 Ns

The units for Impulse are

- a) kg
- b) m/s
- c) Ns
- d) kgs
