

FORMULAS AREAS Y PERIMETROS

Une según corresponda

Area $A = b \times h$	Perímetro $P = b + b + h + h$
---------------------------------	---

Area $A = b \times h$	Perímetro $P = b + b + h + h$
---------------------------------	---

Area $A = \frac{b \times h}{2}$	Perímetro $P = L + L + L$
---	-------------------------------------

Area $A = \frac{D \times d}{2}$	Perímetro $P = L + L + L + L$
---	---

Area $A = \pi \times r^2$	Circunferencia $C = \pi \times d$
-------------------------------------	---

Area $A = L \times L$	Perímetro $P = L + L + L + L$
---------------------------------	---

Area $A = \frac{p \times a}{2}$	Perímetro $P = L \times \# \text{ de lados}$
---	--

Area $A = \frac{(B + b)h}{2}$	Perímetro $P = B + b + L + L$
---	---
