

READING PROJECT- INTENSIVE READING TASK 1

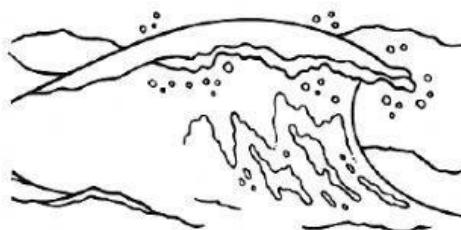

1

The Big Wave

The Amazon is a huge river. It is in South America. Sometimes, there are big waves in the Amazon. The tides cause the waves. The tides push ocean water into the river. The ocean water crashes into the river water. A big wave is made.

The big wave races back to the ocean. It makes a loud sound. People can hear the wave from far away. They can hear it long before they can see it.

Some people try to surf on the wave. It is very hard. The wave is big, fast, and powerful. The surfers are in danger. They have to watch for what is in the water. Big trees are in the water. Snakes are in the water.

Find the Answers

- 1.** The big wave is made when
 - a. snakes crash into river water.
 - b. surfers crash into river water.
 - c. big trees crash into river water.
 - d. ocean water crashes into river water.

- 2.** Where is the Amazon River?
 - a. Asia
 - b. Antarctica
 - c. South America
 - d. North America

- 3.** From the story, you can tell that some surfers
 - a. think the wave is small and weak.
 - b. ride the big wave.
 - c. catch the snakes.
 - d. collect the wood.
