#### LOST!

I've lost my mobile phone.  
It's white and has a sticker with a funny cat on it.  
I last used it this morning in the canteen.  
If you find it, please leave it in the library.  
Thank you.

Mark Gordon (8th grade)

2. Mark wants the finder to bring his phone to the canteen.

## Zadanie 2.

**Dopasuj pytania do poszczególnych części tekstu.**

**Jedno zostało podane dodatkowo.**

- A. What food to prepare?
- B. How many guests to invite?
- C. What activities to organise?
- D. How long should the party be?
- E. How much money to spend on the party?

### HAVING A GREAT BIRTHDAY PARTY

*Organising your birthday party can be very stressful for your parents. To make things easier, discuss the details and plan the party together.*

1. ☐

It's best to have only your closest friends at the birthday party. Inviting up to ten people seems to be a good idea. The number of friends who come to the party is very important. For more guests you need more preparation, more space, and more food.

2. ☐

One of the biggest issues is party timing so think carefully about it. For primary school teenagers, a party which lasts for about three hours is optimal. It's better if you organise a shorter party which finishes before your guests get tired or bored.

3. ☐

It's more fun when a party is based on some theme. It can be your favourite superhero. Or you can have a Mexican or Italian style party with music and clothes from these countries. Your guests will enjoy doing things together. To create a friendly atmosphere, start with a fun quiz and continue with some games.

4. ☐

There is no birthday party without a birthday cake. You can make it yourself or buy it. Don't offer your guests sweets only. Choose something simple like sandwiches, mini sausages or breadsticks. And make, for example, pizza or pasta so that your guests won't get hungry.

#### A FROG LOVE STORY

Two years ago on Valentine's Day, a group of biologists put up a profile on *Love.com* for Romeo, a water frog. Romeo lived alone in the Museum of Natural History in Bolivia. Biologists from the museum started a project focused on finding a Juliet, a female partner for Romeo. As part of the project, they created Romeo's profile on the dating website. They asked *Love.com* users to help finance an expedition to find Juliet. Of course no lady-frogs or their owners messaged Romeo, but *Love.com* users gave the sum of \$25,000 for the expedition.

With the money from *Love.com* the biologists travelled to zoos in Bolivia to find a female water frog. They also visited mountain villages. Unfortunately, nobody could help them. But one day during an expedition to the forests in Bolivia, Teresa Badani, the expedition leader, was walking along the river when she saw a frog which looked exactly like Romeo. Teresa jumped into the water and caught it. It was a female water frog.

The new frog was taken to the museum to meet Romeo. They were placed in the same aquarium. The scientists were afraid that Romeo and Juliet would be either scared or aggressive but nothing like that happened. Juliet was definitely more outgoing and energetic than Romeo. Although he was quite shy, he swam close to her and started to sing a frog love song to Juliet. When he finished, Juliet ate all of Romeo's food. But he didn't mind that at all.

Help me find  
my match ♥

1. Why did biologists create a profile on *Love.com* for Romeo?

A. To collect money for their project.

☐

B. To contact other frog owners.

☐

C. To get advice from its users.

☐

**2. Where did Teresa Badani find a partner for Romeo?**

A. In a zoo in Bolivia.

☐

B. In a river in a forest.

☐

C. In a mountain village.

☐

**3. Juliet, the female frog, is**

A. just as shy as Romeo.

☐

B. more scared than Romeo.

☐

C. more energetic than Romeo.

☐

**4. What did Romeo do when he met Juliet?**

A. He ate her food.

☐

B. He started to sing.

☐

C. He stayed away from her.
