Technology and internet provide us with a lot of convenience.

We can use mobile phones or computers to learn online.

We can go online to learn through different methods, for example doing research, watching video clips and playing games. I feel it is very interesting.

There are a lot of benefits to online learning.

Firstly, we can do Home Based Learning. If we are unwell, we can learn at home through the internet. We can learn any time we want.

Secondly, we can determine our pace of learning. For example, if we do not understand the lesson videos, we can watch a few more times.

Some students do not like online learning, they prefer to attend physical lessons in class, because they can ask their teachers questions, and teachers can explain to them.
