

Microsoft Excel

1. Arrastra el nombre correcto de las partes de la hoja de Excel.

FICHAS	FILA	ZOOM	CELDA
TÍTULO	CINTA DE OPCIONES	BOTONES DE CONTROL	COLUMNA

2. Observa las siguientes imágenes y selecciona la opción correcta si pertenece a Columna, Fila, Celda

3. Selecciona el nombre de cada celda, observa el ejemplo.

Ejemplo

The example shows an Excel spreadsheet with columns A through E and rows 1 through 14. Several cells are highlighted with different colors: B4 is orange, D4 is green, C9 is blue, and B13 is yellow. Arrows point from the text 'Ejemplo' to the B5 cell, and from the text 'B5' to the B5 cell. Other arrows point from the text 'B5' to the B4, D4, C9, and B13 cells.

4. Identifica y selecciona el nombre de la celda donde se encuentra cada valor.

The first row contains two spreadsheets. The first spreadsheet shows the value 221 in cell D2. The second spreadsheet shows the value 234 in cell C6. Below each spreadsheet is a green box for the answer.

The second row contains two spreadsheets. The first spreadsheet shows the value 56 in cell B8. The second spreadsheet shows the value 34 in cell A1. Below each spreadsheet is a green box for the answer.
