

Human body

TEST

1. Match each process involved in nutrition to its body system and function.

- | | | |
|---------------|----------------------|--|
| • Digestion | • circulatory system | • oxygen and nutrients are carried in the blood |
| • Respiration | • excretory system | • you absorb the nutrients your body needs |
| • Circulation | • digestive system | • you breathe in air and obtain the oxygen you |
| • Excretion | • respiratory system | • you expel the waste materials that your body does not use. |

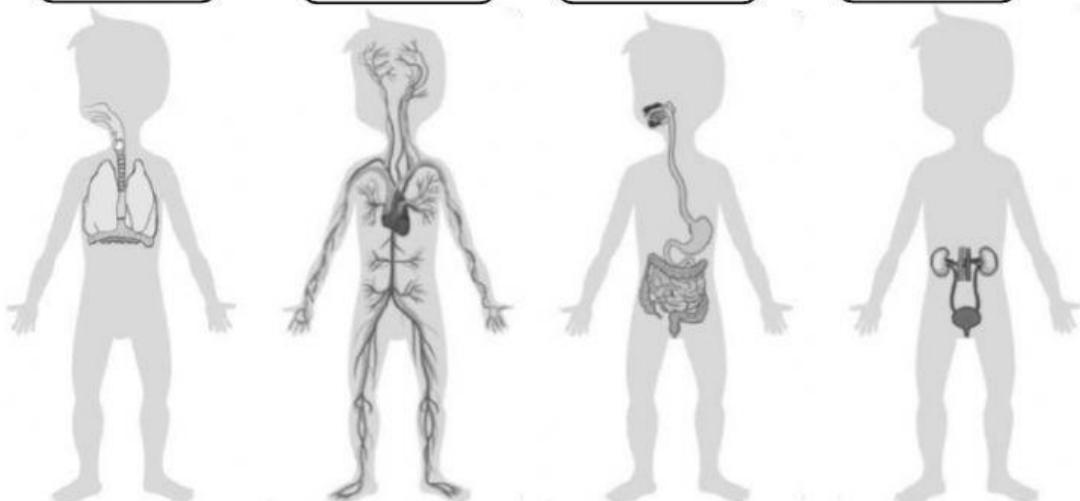

2. Drag the name of each system into the corresponding box.

EXCRETORY SYSTEM

CIRCULATORY SYSTEM

RESPIRATORY SYSTEM

DIGESTIVE SYSTEM

3. Drag the corresponding word

old age

adolescence

childhood

adulthood

4. Match the two halves to make a true sentence:

The baby develops

and oxygen from the mother.

Reproduction is the ability

about nine months.

Pregnancy lasts

their mother's milk or artificial milk.

Men and women have

inside the mother's uterus.

Children and parents

share physical characteristics.

The baby receives food

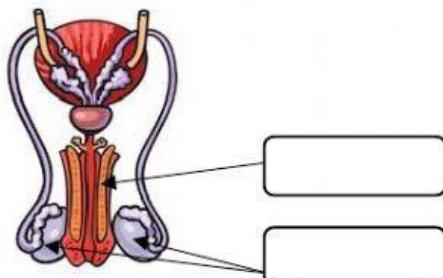

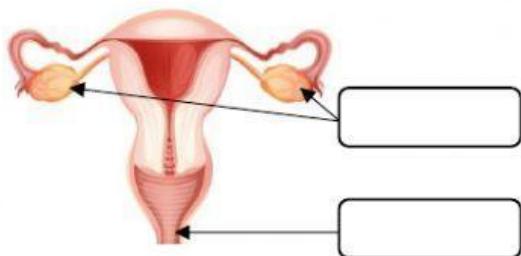

to have offspring.

Babies drink

different reproductive organs.

5. Drag the words

penis – ovaries – vagina – testicles

6. Match this information about the nervous and locomotor system

Carry information from the sense organs to the brain

Nerves

Interprets information received from the sense organs

Makes decisions and sends orders to the locomotor system

Brain

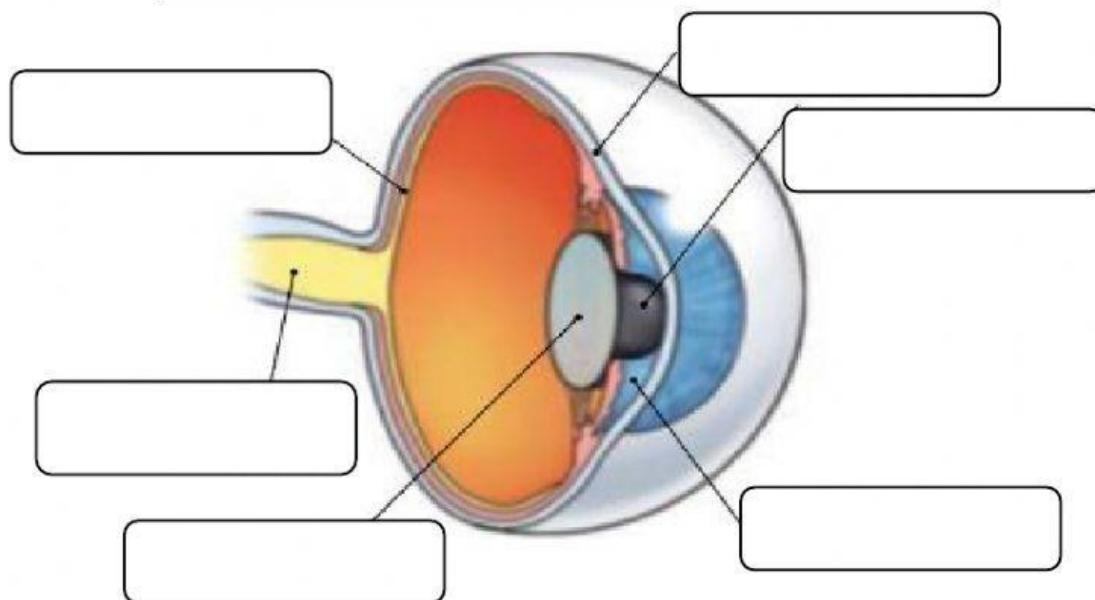

Carry orders from the brain to the locomotor system

7. Choose the correct option:

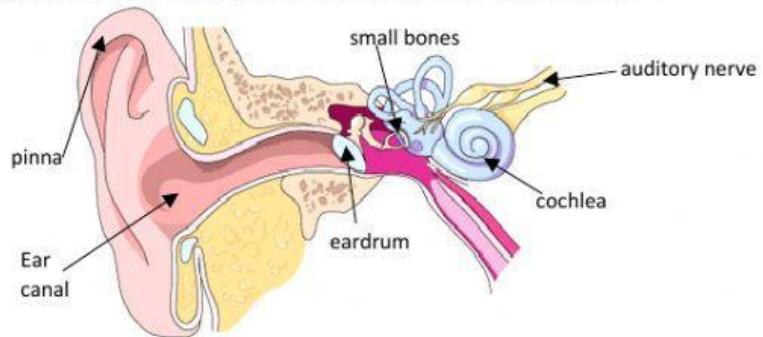

- ✓ The eyes are the sense organs of brain / sight.
- ✓ The pupil / eyelids, eyelashes and eyebrows protect the eyes.
- ✓ The brain / pupil is the hole in the centre of the iris through which light passes.
- ✓ When we see an object, the information is sent to the sight / brain through the optic nerve/ sight.

8. Label the parts of the eye

optic nerve – retina – iris – pupil – lens – cornea

9. Look at the picture and complete the text with the words:

The ears are the sense organs of hearing. The _____ captures the sound. Then, the sound travels through the _____ to the _____. The eardrum vibrates with the sound. The eardrum is connected to the _____. These bones move when the eardrum vibrates. The _____ captures the sound vibrations. The _____ takes the information to the brain.

10. Write the corresponding sense organ: **eye, ear, skin, tongue or nose**

cochlea	nostrils
nasal cavity	touch receptors
taste buds	flavours
iris	small bones
pupil	hairs
auditory nerve	pinna

Now, complete the pictures with some of the words of the previous activity:
