### Tips to help conserve Water Indoors and Outdoors

Drought is a big problem that needs to be taken seriously. Everyday activities like brushing your teeth or taking a shower can use large amounts of water. By reducing the amount of water you use, you can help maintain a healthy environment.

 Write some ways you can do to conserve or save water.

Activities	What should you do to save water?
Leaving the tap running when brushing your teeth, washing or shaving.	
Taking long shower.	
Flushing the toilet more often in a day.	
Leaking tap and showers.	
Using washing machine for just a few clothes.	
Using a hose to water the garden.	
Washing the car using a hose.	
Washing vegetables and fruits under running water.
