Unit 6.1 The Earth's move around the Sun

Q1. Use these words to complete the diagram: *North Pole, northern hemisphere, day time, South Pole, night time, southern hemisphere, equator, Earth's axis*

Q2. Use these words to fill in blanks

<i>North Pole</i>	<i>summer</i>	<i>year</i>	<i>seasons</i>	<i>anticlockwise</i>
<i>hemisphere</i>	<i>tilt</i>	<i>northern</i>	<i>orbit</i>	<i>slight ellipse</i>

Earth's orbit

The path the Earth revolves the sun is called an _____. The orbit's shape is _____. The Earth moves around the sun in an _____ direction. It takes 365¼ days or 1 _____ for the Earth to complete its orbit around the sun.

The seasons

The _____ are caused by the Earth orbiting the sun once a year and the _____ of the Earth's axis.

Countries between the Equator and the _____ are in the northern _____. When the northern hemisphere is tilted towards the sun, the days in _____ hemisphere are long and the nights are short. So, the northern hemisphere has _____, the southern hemisphere has winter.

Q3. Choose the correct seasons.
